Porcelain Tile
by Florim USA

Health Product
Declaration v2.3

created via: HPDC Online Builder

HPD UNIQUE IDENTIFIER: 769817138176

CLASSIFICATION: 09 30 13 Ceramic Tiling

PRODUCT DESCRIPTION: All Florim USA porcelain tile products are manufactured in a high-temperature kiln process. The temperatures attained there initiate physical and chemical transformations and reactions resulting in the formation of a hard, dense structure characterized by low porosity (<0.5%) that is chemically inert. Florim USA manufactured porcelain tiles, including all brands sold under the Florim USA umbrella, contain no VOCs, are non-flammable, and do not produce smoke or release toxic gases when exposed to elevated temperatures. Their low porosity prevents the absorption of liquids, vapor, toxic substances, or micro-organisms thereby preventing the generation of reactions, putrefaction, or microbial growth and are suitable for use on floors or walls. Thus, the finished product is one of the most durable, environmentally friendly, and long-lasting choices for interior and exterior use.

INVENTORY AND SCREENING NOTES:

*Form-Specific Hazard: This substance's GreenScreen Benchmark or List Translator score and the applicable hazards are related to particulate inhalation, which is expected to occur only during manufacture, installation, maintenance, or demolition, due to activities such as sawing, sanding, grinding, or intensive cleaning. For this reason, this score is intentionally omitted from the "Contents highest concern" line above. See HPDC's Special Conditions policy for more information.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpdcollaborative.org/hpd-2-3-standard

PORCELAIN TILE

PRODUCT THRESHOLD: 100 ppm RESIDUALS AND IMPURITIES EVALUATION COMPLETED: Yes

RESIDUALS AND IMPURITIES NOTES: All suppliers provided residual and impurity information and those that fall above the stated threshold are included on this HPD.

OTHER PRODUCT NOTES: The substance percentage ranges ensure coverage of all porcelain tile products which includes different alternative base materials and pigments according to the desired color and specification of the final product. Additionally, post-industrial recycled content from scrap products is utilized during the manufacture of this product, meaning all substances could have post-industrial recycled content included.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
