## Certification Letter for LEED® Projects

PAMESA CERAMICA COMPACTTO, S.L.U Cno. Alcora 8 - Apto. correos: 14 - 12550 – Almassora (Castellón)-Spain  
company certified:

SHENANDOAH (Bla) contributes toward satisfying Credits under LEED:

| LEED 4.1. BUILDING DESIGN + CONSTRUCTION                                    |                    |
|-----------------------------------------------------------------------------|--------------------|
| New Construction                                                            |                    |
| SUSTAINABLE SITES                                                           |                    |
| Heat island reduction                                                       | Possible 2 points  |
| Option 1. Nonroof and roof                                                  | Possible 2 points  |
| Option 2. Parking under cover                                               | Possible 1 point   |
| Open space                                                                  | Possible 1 point   |
| ENERGY AND ATMOSPHERE                                                       |                    |
| Minimum energy performance                                                  | Required           |
| Optimize energy performance                                                 | Possible 18 points |
| Option 1. Whole-building energy simulation                                  | Possible 18 points |
| Option 2. Prescriptive Compliance: ASHRAE<br>Advanced Energy Design Guide   | Possible 6 points  |
| Option 3. Systems Optimization                                              | Possible 4 points  |
| MATERIALS AND RESOURCES                                                     |                    |
| Building life-cycle impact reduction                                        | Possible 5 points  |
| Option 3. Building and material reuse                                       | Possible 4 points  |
| Option 4. Whole-building life-cycle assessment                              | Possible 4 points  |
| Building product disclosure and optimization -<br>Sourcing of raw materials | Possible 2 point   |
| Responsible sourcing of raw materials                                       | Possible 2 points  |
| Building product disclosure and optimization -<br>Material ingredients      | Possible 2 points  |
| Option 1. Material ingredient reporting                                     | Possible 1 point   |
| Option 2. Material ingredient optimization                                  | Possible 1 point   |
| Construction and demolition waste management<br>planning                    | Required           |
| Construction and demolition waste management                                | Possible 2 points  |
| Option 1. Diversion                                                         | Possible 2 points  |
| Option 2. Reduction of total waste material                                 | Possible 2 points  |
| INDOOR ENVIRONMENTAL QUALITY                                                |                    |
| Low-emitting materials                                                      | Possible 3 points  |
| Construction indoor air quality management plan                             | Possible 1 point   |
| Indoor air quality assessment                                               | Possible 2 points  |
| Option 2. Air testing                                                       | Possible 2 points  |
| Performance-based indoor air quality design and<br>assessment               | Possible 7 points  |
| Tier 1. Contaminant-based IAQ design                                        | Possible 1 point   |
| Tier 3. Demonstrate IAQ Performance                                         | Possible 3 points  |
| REGIONAL PRIORITY                                                           |                    |
| Regional priority                                                           | Possible 2 points  |
